A Word from our Chair

Dear Colleagues,

After careful preparation, and a commitment to “being different” from other paediatric conferences, the EAP MasterCourse over the past few years, despite an ever-increasing number of conferences in Paediatrics, has attained a very special reputation.

Over one-and-a-half days, based on most recent publications, the conference presents a fantastic workshop, named Mastercourse in Paediatrics. The MasterCourse this time will be focused on Vaccines and Paediatric Infectious diseases.

Adamos Hadjipanayis, MD
President, EAP
