ESPGHAN YOUNG INVESTIGATOR FORUM

SEPTEMBER 21 – 24, 2024
ZADAR, CROATIA

We thank your **EPP Partners** for their valuable support.

PROGRAMME

The ESPGHAN young investigators forum (YIF) has been an integral part of the society for the last 24 years. The meeting was established to nurture academic development in the society and foster collaborations amongst the emerging generations of academics and clinicians. Over the years YIF has seen so many of the delegates come through to become established academics and clinicians as well as develop friendships and successful collaborations across Europe.

The Aims of the ESPGHAN Young Investigator Forum are:

- to provide young investigators with a friendly and constructive atmosphere in order to present their research and learn from each other.
- to meet and network with senior faculty members and to set up research collaborations in Europe.
- to enable young investigators to contribute to the scientific development of ESPGHAN.
- to select candidates for ESPGHAN research curriculum.

The course language is English.
